

## **Project Announcement for TESL Ontario Affiliates**

Earlier this year, TESL Ontario initiated an exciting new project funded by Citizenship and Immigration, Ontario Region – the design of a framework for post TESL Certificate training for ESL instructors in Ontario. Post TESL Certificate training is intended for practicing LINC and ESL instructors who have already completed initial TESL Certificate training. The goal of this project is to provide standards and recognition of post TESL Certificate Training for LINC and ESL instructors. This framework will draw on a variety of research sources and include consultation with a broad range of stakeholders including instructors, administrators, learners and teacher trainers. The TESL Ontario project team is currently developing tools to carry out this process of consultation to gather input. From May to July, focus groups will be held across Ontario in different workplaces and a survey will be emailed to TESL Ontario members. Your input is essential to developing a framework of post TESL Certificate training that will be relevant and of benefit to ESL instructors in Ontario. Please visit the TESL Ontario website to find out more about the project and stay tuned for the survey. If you have any questions, the project team will be happy to help – just email [frameworkinfo@teslontario.ca](mailto:frameworkinfo@teslontario.ca).
